Uten.Silo RE

Dorothee Becker, 1969

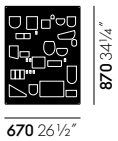

Dorothee Becker designed the practical Uten.Silo RE I organiser tool in 1969 and added the smaller Uten.Silo RE II in 1970. Mounted on the wall and equipped with containers of different shapes and sizes, metal hooks and clips, they bring order to offices, kitchens, workshops, bathrooms and children's rooms.

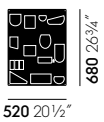

In 2025 Vitra modified production to use recycled post-industrial ABS plastic and added Japanese red and horizon blue to the existing range of deep black and white. Vitra is now continuing to update the product line with the addition of five new colours for Uten.Silo RE II: tangerine, golden olive, citron, lilac and cashew. This ensures that a Uten.Silo RE II is available in a suitable colour for every taste and interior.

- **Material:** recycled post-industrial ABS plastic, 100% recyclable.
- **Hooks:** nickel-plated metal.
